

The **Technology Prize 2007** of the German defence industry was awarded to Secopta GmbH and Clausthal University of Technology

Award ceremony at the BDI, Nov. 2007

Clausthal University of Technology and Secopta GmbH has been awarded for developing a new method of detecting land mines using laser technology. The system called “LIBS-PROD” allows identifying hidden object in soil.

The award ceremony was located at the BDI (Federation of German Industries) in Berlin in November 2007.
